Ruby is my ~~most~~ ~~second~~ third favorite programming language of all time.

1. My language, Teepee, eventually (*but not yet*)
2. Common Lisp
3. Ruby

.

.

.

999. Java

**Nearly every programming language has a way
to do a list of things.**

Ruby has arrays.

```
1 a = [1,2,3,4,5]
2 a.class # Array
3 a.length # 5
4 a.first # 1
5 a.map {|ai| ai*2} # [2,4,6,8,10]
```
